

If skin
diseases

are not
treared

at an earlier
stage

then it
may

lead to
complications

By
investigating

it can be

identified
and cured

at the

earliest
stge

Skin tone
and skin
colour

play an

important
role

in

skin
disease
detection

The person
can capture

and

send the
image

to the

trained
model

It helps

to

cure the
disease

in order to

avoid
spreading
